

TrainTechnology Solutions

A protection rating that inspires

REO type NTT/WS

With the constantly growing demands of the railway engineering sector today higher protection ratings are required.

As a long-time manufacturer of inductive and resistive components REO is following the goal to present optimal solutions to our customers.

To protect chokes and transformers against exterior influences like water, brake dust and other deposits, they are completely impregnated with epoxy resin. As result, core and windings are efficiently protected and the life time is increased.

With the product range NTT WS REO offers chokes and transformers with protection ratings up to IP 65 - to enhance the efficiency and safety of railway drive systems and peripheral electrical equipment.

REO – always good for innovation.

For railway engineering REO offers as well as other items:

- NTT BW – Braking, damping and filter resistors
- NTT – Reactors, motor chokes, filter inductors and tuned-filter chokes, EMC, dv/dt, and AC/DC chokes
- RFI, sinusoidal, and harmonic filters
- NUT – Inverter, AC, power and high-frequency transformers
- Current transformers and special components for energy regeneration
- NPT – Test chokes and loads for frequency drives
- REOLAB mobile – Mobile AC/DC power supplies for workshops
- REOLAB – Equipment for soak and function testing
